SST Series - Advanced Line Day Tanks

Construction:
UL 142 aboveground steel tank all seam welded, square, atmospheric tank of heavy gauge steel with internal reinforcements, tested to 5 PSI test pressure. Welded flange pipe fittings for fuel return, overflow, vent, drain. Submerged fuel oil supply drop tube. Heavy gauge steel channel feet with mounting holes. Separate mechanical and electrical compartments, each with steel housing and removable access covers. Standard equipment:
- 2 GPM SUPER-XL Pump
- SST Controller

Secondary Containment
Option 190: UL142 Secondary Containment Dike
Option 191: Leak Sensor

Super-XL Pump:
The SUPER-XL Pump consists of the following:
- 2 GPM, high vacuum, positive displacement gear pump consisting of two pressure loaded, intermeshing, hardened steel, precision ground gear assemblies within a high strength die cast aluminum housing. Mechanical shaft seal. Pressure loaded to be self-compensating for internal wear.
- 1/3 HP, 120V, single-phase ODP motor. Oversized for high starting torque.
- Motor overload protection
- Optional pumps-motors available.

SST Level Controller:
UL 508 LISTED

Indication Functions
Indicators are long life, extra-bright large display, L.E.D.’s:
- Fuel level
- Power available
- Switch off (flashing)
- Pump running
- Low level alarm
- Overflow alarm/pump control backup activated

Outputs
- Pump start-stop (1HP)
- Low level alarm (60W)
- High level alarm (60W)

Control Functions
120V AC or 24V DC
- “Auto-off-manual” pump control switch
- “Press to test” pump push-button
- Pump start-stop automatic level control
- Automatic disconnect of pump on overflow/high level alarm

See SRS Series for 50 gal and above.
This is an industrial product, not a consumer product. It must be specified, installed, operated and maintained by individuals equipped with the appropriate training and skills. This tank conforms to applicable portions of the following standards: NFPA 30 and NFPA 37, UL 142, UL 508.

All fuel piping should be of black iron or copper pipe. Pipe sizes should follow engine manufacturer’s recommendations based on KW of generator set.

**NOTE:** The emergency vent line capacity specified on the placard at the top of the tank must be considered in order to maintain the fire safety factors established by NFPA 30 and UL 142. If installation is intended to conform and benefit from the inherent safety advantages of the NFPA 30 and UL 142 installation standards, observance of the value is mandatory. It may be necessary to increase the vent pipe diameter if the run is long, or install an emergency vent at the tank.

**Maintenance**

**Every Six Months:**
Inspect this tank at least every six months for damage, leakage, or rust on both inside and outside of the tank. Promptly repair or replace any significantly damaged or deteriorated tank.

**Annually:**
Drain water and sediment from day tank sump at least once each year, or more frequently depending on usage and condition of the fuel.

**Recommended Options**

**Main Storage Tank Is Underground:**
When the main fuel storage tank is located underground, one of the following options is recommended to assure maintenance of day tank pump prime. Option 070: Check valve on pump intake, Option 080, 083: Solenoid valve on pump intake, Option 090: Foot valve.

**Initial Installation:**
Hand pump is recommended for use as a back-up to the motor pump and to prime the motor pump on initial installation. Option 015: 5 GPM (5 strokes/gallon) hand pump.

**Special Requirements**

**Above Ground Storage Tank:**
When the main fuel storage tank is located above the level of the day tank, the following options are required; Options 060, 080, 087: Solenoid valve, with fuel strainer, on intake to prevent tank flooding. Consider also: #190/191: Overflow basin and overflow alarm, #383: Overflow-return tank, #390: Overflow return pump and controller.
Piping & Installation

Note:
All fuel piping should be of black iron or copper pipe. Pipe sizes should follow engine manufacturer's recommendations based on KW of generator set.

Emergency Vent:
For tanks equipped with emergency tank vent (100-400 gallon), install weighted type emergency vent cap (Option #064) at this fitting. Install vent on 18-inch riser.

**Mechanical**
- 010 Auxiliary hand pump
- 015 Auxiliary hand pump
- 025 Locking manual fuel fill cap
- 040 Wall-mounting brackets
- 050 Pipe stand adapter
- 060 Fuel strainer
- 062 Duplex strainer
- 063 Vent cap
- 064 Emergency vent
- 065 Drain hand valve
- 068 Emergency quick-drain
- 070 Priming tee & check valve assembly
- 080 AC Solenoid valve
- 083 DC Solenoid valve
- 087 Manual shut-off valve, bronze
- 088 Manual shut-off valve, fire rated
- 090 Foot valve
- 093 Fusible link valve
- 095 Pressure relief valve
- 100 Pressure gauge
- 101 Vacuum gauge
- 103 Flow gauge
- 104 Ball motion flow indicator
- 120 Extra 1” NPT pipe connection
- 125 Extra supply suction tube
- 130 Oversize pipe connection, 1 ¼” to 2 ½” NPT
- 131 Oversize pipe connection, 3” to 6” NPT
- 140 Special paint color
- 141 Epoxy primer
- 150 Extra-heavy tank construction
- 180 Weatherproof Modification
- 185 2 or 3 complete day tanks mounted on common base
- 190 Overflow basin
- 191 Rupture float switch
- 192 Basin drain hand valve
- 194 Gravity drain for overflow basin, use with option 190
- 195 Screen top for overflow basin
- 196 Weatherproof cover for overflow basin

**Control Devices and Alarms**
- 260 Disconnect switch
- 261 System circuit breaker
- 262 Control power transformer
- 265 Day tank heater
- 270 Power available green pilot light
- 280 Operation mode selector switch
- 285 Loss of flow alarm
- 295 Remote low fuel level alarm, dry signal contacts

**Options Checklist**
- 297 Remote high fuel level alarm, dry signal contacts
- 299 Auxiliary relay, use w/options 295 & 297 above
- 311 Local/remote low fuel level alarm, sensing 30% of capacity
- 312 Local/remote high fuel level alarm, sensing 103% of capacity
- 325 High fuel level emergency pump-stop switch
- 326 High level cutout for SDE Series only
- 329 Low fuel level red light
- 333 Critical low fuel level alarm-engine shut down
- 334 Alarm horn
- 340 “Pump Running” amber light

**080 Solenoid valve**
- 376 Manual reset solenoid valve

**180 Weatherproof Modification**
- 190 Overflow basin
- 196 Weatherproof cover
**Options Checklist cont’d**

### Duplex Pump Systems
- **345** Multifunction duplex pump controller
- **346** Two running time meters
- **347** Manual duplex pump selector switch

### Gravity Fed Day Tanks
- **060** Solenoid valve, with fuel strainer, on intake to prevent tank flooding
- **080** Manual reset, normally open, electrically operated valve
- **087** Siphon-break solenoid valve for remote installation
- **376** Anti-siphon valve
- **377** Overflow-return tank

### Sight Glasses
- **211** Safety sight glass without rupture basins
- **212** Electric level gauge on tanks, 12" min. tank depth
- **214** Digital fuel flow indicator

### Fuel Oil Coolers
- **396** Radiator with electric fan, flow switch

### Pumps and Motors
- **002** Deletion of Standard Pump & Motor. 10A @ 125/250V AC, 10A @ 30V DC, Form C contacts provided
- **400** 7 GPM pump
- **410** 10 GPM pump
- **415** 17 GPM pump
- **417** 25 GPM pump
- **420** 3 GPM pump
- **422** 5 GPM pump
- **424** 11 GPM pump
- **426** 13 GPM pump
- **428** 36 GPM pump
- **430** 45 GPM pump
- **432** 61 GPM pump
- **510** Transformer, 480/120V AC, 1Ø, 50-60 Hz
- **511** Transformer, 480/120V AC, 1Ø, 50-60 Hz
- **605** 1/2 HP, 230V AC, 1Ø, 60 Hz motor, ODP

### Optional Motors requiring SPS/SKS Pump Set when used with 10 through 400 gallon models
- **1000** 1/2 HP, 115V AC, 1Ø, 60 Hz motor, ODP
- **1005** 1/2 HP, 230V AC, 1Ø, 60 Hz motor, ODP
- **1025** 1/2 HP, 230/460V AC, 3Ø, 60 Hz motor, ODP, w/starter
- **1050** 1 HP, 115V AC, 1Ø, 60 Hz motor, ODP, w/starter
- **1075** 1 HP, 230V AC, 1Ø, 60 Hz motor, ODP, w/starter
- **1100** 2 HP, 115V AC, 1Ø, 60 Hz motor, ODP, w/starter
- **1105** 2 HP, 230V AC, 1Ø, 60 Hz motor, ODP, w/starter
- **1125** 2 HP, 230/460V AC, 3Ø, 60 Hz motor, ODP, w/starter
- **1200** 3 HP, 115V AC, 1Ø, 60 Hz motor, ODP
- **1205** 3 HP, 230V AC, 1Ø, 60 Hz motor, ODP
- **1225** 3 HP, 230/460V AC, 3Ø, 60 Hz motor, ODP, w/starter
- **1300** 5 HP, 230V AC, 1Ø, 60 Hz motor, ODP
- **1322** 5 HP, 230V AC, 3Ø, 60 Hz motor, TEFC
- **1325** 5 HP, 230/460V AC, 3Ø, 60 Hz motor, ODP, w/starter
- **1405** 7 1/2 HP, 230V AC, 1Ø, 60 Hz motor, ODP
- **1422** 7 1/2 HP, 208V AC, 3Ø, 60 Hz motor, ODP
- **1425** 7 1/2 HP, 230/460V AC, 3Ø, 60 Hz motor, ODP, w/starter
